Abstract

The spirit of resistance was formed and developed by the Communist Party of China in the great struggle of the arduous War of Resistance against Japan to achieve national independence. In the process of building the school, the north-east old China Aviation School has formed the "old aviation school spirit" of "united struggle, hard work, brave dedication and opening up new roads". The old aviation school spirit and resistance spirit have the history, theory and practical logic of occurrence, development and evolution. It contains, "Seeking happiness for the Chinese people, Seeking rejuvenation for the Chinese nation", the original aspiration and mission, the Northeast Old Aviation School was founded in the war years just after the end of the Anti-Japanese War, and played an indelible historical role in the establishment and growth of the People's Air Force. The spirit of the old aviation school will be continuously enriched, developed and improved in the theoretical interpretation and practical exploration, Bloom in the light of the new era.

Keywords

Old Aviation School, Resistance, Spirit, Inner, Logic

Marx pointed out: "People make their own history, but they do not create as they want, not under the conditions that they choose, but under the conditions that are directly encountered, established, and inherited from the past." The spirit of resistance was formed and developed by the Communist Party of China in the great struggle of national independence in the War of Resistance against Japanese Aggression. The old Northeast Aviation School was founded in the war years just ended in the War of Resistance against Japanese Aggression, and played an indelible historical role in the establishment and growth of the People's Air Force. The spirit of the old aviation school and the spirit of resistance itself, it has the internal logic of occurrence, development and evolution.

1. The historical logic of the old aviation school spirit and the great spirit

1.1 The spirit of resistance is the source of the spirit of the old navigation school

Both from the dimension of event development, or from the dimension of time order, the spirit of resistance and the spirit of the old aviation school have a strong correlation. The spirit of resistance and the old navigation school were formed during the War of Resistance against Japanese Aggression and the War of Liberation respectively.

The spirit of resistance is an important source of the spirit of the old aviation school, which has an important enlightenment for the formation of the old aviation school spirit. The outbreak of the War of Resistance against Japanese Aggression opened the Communist Party of China in the practice of the Sinicization of the revolutionary road of Marxism. At that time, the Chinese Communists began to think independently, deeply and practice about how to defeat imperialism. It is also the setbacks experienced in the process of exploring the "great opening" of the Chinese revolutionary road of Marxism during the War of Resistance against Japanese Aggression that provide a very important and profound historical lessons for exploring a correct revolutionary path that organically combines Marxist theory and Chinese revolutionary practice. From this point of view, the spirit of resistance has played an important role in enlightening and forming the spirit of the old aviation school, and provided a very important spiritual material (PLA Publishing House, 2018).

The revolutionary spirit of the old Northeast Aviation school is the inheritance and development of the traditional style of the Red Army University and the Anti-Japanese Military and Political University. Fighting the school spirit of the university is an important part of the glorious tradition of the party and the army. Her victory in the revolutionary war, the strengthening of the party and the army, and the development and construction of the air force have had a great impact, and will always be our "heirloom".

1.2 The spirit of resistance is the starting point of the spirit of the old aviation school

Old school is in Mao zedong, Zhu De, Zhou Enlai, under the leadership of the Chinese communists, under the care of the CPC Central Committee, closely rely on the leadership of the northeast bureau, northeast democratic coalition headquarters and northeast people support, formed a "solidarity, hard work, dedication, pioneering" old school spirit, in not long time, overcome the difficulties, started the school, cultivate the "seed", for the construction of the new China people's air force and the development of aviation, prepared the various aspects of the leadership backbone. From the point of time, the steps of the establishment of the University of China and the formation of the spirit of the university started from the perspective of the leaders, the leaders Mao Zedong, Zhou Enlai, Zhu De led the establishment and development of the school, and MAO Zedong personally made the teaching plan and teaching. Therefore, there is a relationship between the spirit of the old aviation school and the spirit of resistance.

The spirit of resistance is the starting point of the old aviation school spirit. It is one of the largest cadre schools founded by the Party during the Yan'an period (National Defense University Press, 1996). Founded from 1936 to the end of 19459 years, the school 8 period of training cadres, training students and cadres more than 100,000 people, is a throughout the party's main anti-Japanese base of extremely important military and political institutions, is the party in the period of resistance cadre education, it strongly promoted the development of the party in the resistance period of education, is also the party in the war of resistance cadre education important symbol of success. With the development of the situation in northeast China and the increase of the school construction staff, the approval of the Northeast Bureau expanded the aviation team to the aviation corps, laying the foundation for the establishment of the aviation school. The old aviation school is like a laboratory, scattering the excellent seeds cultivated into the various parts of the motherland where flight talents are bred, and constantly blooming and bearing fruit, playing an important role in the development and growth of the People's Air Force in the early days of the founding of New China (Memorial Committee, 1986).

Chinese Communists have continued and developed the spirit of resistance to the great. The formation of the old aviation school spirit cannot be separated from the nourishment of the spirit of resistance, which is richer than the spirit of resistance to the great, and is the expansion and deepening of the spirit of the great.

2. The theoretical logic of the old aviation school spirit and the spirit of resistance

In the history of the People's Liberation Army, the old aviation school, is a brilliant page. During the extremely difficult war, the old aviation school took the first step in the modernization of our army, laying for the formation of the People's Air Force, the naval aviation, the establishment and development of the new China aviation industry and civil aviation industry, and even the subsequent space feat, which can be called the "resistance" of the new China aviation.

2.1 A Great purpose produces a great power

The purpose of the old aviation school is great, which is the power and source of innovation. The old navigation school to the liberation of the people, the revitalization of the nation as the purpose, to the people's army to "from the land to heaven" for the purpose, so as to verify the great scientist Einstein said: "a great purpose produces a great power". The old aviation school not only in the face of the war, but also in the face of science, won the victory, achieved success, the seemingly impossible things, the implementation of the people's desire for many years to achieve, whether cold, tired, dangerous, casualties, or strange, boring, complex, profound, failed to stop the pace of the old aviation school (PLA Literature and Art Publishing House, 2006).

2.2 Scientific attitude climbs the peak of science

The attitude of the old aviation school is scientific, which is the basis and premise of innovation. Old school to "to science" momentum, seize and intelligence science peak, listen to learn as early as in Xinjiang and the Soviet union learned superior professional teaching, and respect the Japanese surrender personnel, full personnel expert advice, from the beginning with one hundred times careful and one thousand times careful to meet the new battlefield—aviation science and technology, never risk, it is forbidden.

2.3 Supernormal thinking attracts extraordinary results

The thinking of the old aviation school is extraordinary, which is the core and the key of innovation. Supernormal, is "and inertia challenge". If according to inertia thinking, there is not enough fuel and equipment, is absolutely can not fly; but, to people's surprise, the old aviation school actually came up with many ways to collect waste equipment everywhere, to serious repair, restore the performance of the aircraft, and use alternative fuel, supplemented by countless careful debugging, finally ensure that enough training flight, cultivate many flight backbone.

2.4 The collaborative team creates a brilliant synergy

The team of the old aviation school is collaborative, the slogan is: "fight by unity", selfless fearless, people-oriented, pay attention to build a brave team, close, complementary, to create a good environment for innovation, provide a reliable guarantee; and then create a group of air combat heroes that we have never been before.

In the war of resisting the United States and aiding Korea, our volunteer air force shot down 330 enemy aircraft and wounded 95. "The Chinese people should not be despised" is deeply rooted in the hearts of the people. Therefore, the innovation of the old aviation school has made a great contribution to the improvement of China's national prestige and military prestige, and the prosperity of its national strength and military strength.

3. The practical logic of the old aviation school spirit and the spirit of resistance

3.1 The spirit of resistance is the precursor of the spirit of the old aviation school

During the Yan'an period, the Communist Party of China combined Marxist theory with China's national conditions and formed a great spirit of resistance (National Defense University Press, 2000). The spirit of resistance was forged in the difficult course of running schools during the Anti-Japanese War. The spirit of resistance is the precursor of the old aviation school spirit. From the basis of practice, the formation of the great spirit mainly stems from the test of blood and fire in the War of Resistance against Japanese aggression, and the practice of dealing with the complex contradictions between the Kuomintang and the Communist Party. The spirit of the old aviation school was conceived in the process of the victory of the War of Resistance against Japanese Aggression and the Communist Party of China in building the People's Air Force. The spirit of resistance and the spirit of the old aviation school have the practice of sinicization of Marxism.

3.2 The spirit of resistance is the forerunner of the spirit of the old aviation school

The spirit of resistance is the forerunner of the spirit of the old aviation school. The spirit of the old aviation school is in the stage of victory and development, formed in the major turning point in the history of the Chinese revolution, and the spirit of resistance is in the initial formation stage. Comprehensive analysis of the composition of the revolutionary spirit spectrum of the Communist Party of China, the spirit of the old aviation school ranks behind the spirit of resistance. From the perspective of history, the spirit of resistance to the Great University, like the spirit of the old aviation school spirit, is the vivid practice of Marxism guiding China's revolutionary struggle and the product of the revolutionary struggle practice of the CPC in different periods. These revolutionary spiritual forms have the following aspects in

common:

First, they all have firm ideals and beliefs and common goals. The highest ideal and ultimate goal of the CPC is to realize communism. Since its establishment, the Communist Party of China has taken the realization of communism as its program of action and goal. In the period of the agrarian revolutionary struggle, no matter how grim the situation, how cruel the struggle, the Chinese Communists are always firm Marxist faith, never give up the pursuit of communism, unswervingly adhere to the belief that the revolution will win, with practical actions to prove that the Chinese Communists have indestructible ideals and beliefs.

Second, they all have the pioneering heroic spirit and indomitable revolutionary will. The creation of the Communist Party of China, the independent leadership of the armed struggle, the creation of the people's army, the long March of earth-shattering revolutionary feats, the defeat of Japanese imperialism, and the building of a strong people's air force... are all revolutionary practices without successful experience to follow. The communist party of China under the conditions of difficult revolutionary struggle, the combination of marxist theory and Chinese revolutionary practice, no matter how many setbacks and failure, suffering and twists, have always uphold the revolution to the end of the faith, dare to create a revolutionary cause, dare to create revolutionary history, at any time do not yield to the kuomintang reactionaries, show not afraid of difficulties, sacrifice, struggle, the revolutionary will.

Third, they all have the eternal value and exuberant vitality beyond time and space. Under the extremely poor material conditions and the great gap between us and the enemy, the most important reason why the Communist Party of China can grow from scratch, from small to big, and from weak to strong is that the spiritual strength has played an important role, and this spirit is the revolutionary spirit of the Communist Party of China. Resistance spirit, the old navigation school spirit and the long march spirit, Yan'an spirit, xibaipo spirit, is an important part of the communist party of China red gene, provides rich nourishing the socialist core values, for the Chinese people constantly from victory to victory injected strong spiritual power, to make the revolutionary spirit show eternal value and exuberant vitality (Air Force College Education, 2018).

In short, the spirit of the old aviation school and the spirit of resistance have profound roots, with profound historical logic, theoretical and practical logic, containing the original aspiration and mission of "seeking happiness for the Chinese people and rejuvenation for the Chinese nation". In the new journey to realizing the Chinese dream of the great rejuvenation of the Chinese nation, the old aviation school spirit and resistance spirit will be constantly enriched, developed and improved in theoretical interpretation and practical exploration, and become an immortal spiritual monument of the Communist Party of China and the Chinese nation. The Times will pass on and shine the light of a new era.
